Cambridge (IGCSE/AS/A levels)
Cambridge & IEB (Campus Somerset West)

**SCHOOL UNIFORM**
Yes

Students learn through a range of experiences. It should be seen holistically, as the intertwining of social, emotional, personal, physical, cognitive and creative influences. Through the themes covered in the classroom, the school fosters the student, who is a co-constructor of knowledge, a researcher and investigator seeking to make meaning of his or her wider world. It is vital for the Generation Schools to include and involve students in their own learning and to make learning a real and meaningful experience.
Curriculum
The curriculum at Generation Schools is based on the programmes of the University of Cambridge International Examinations group, with IGCSE, AS and A Levels in the senior years. Ultimately, the qualifications which the senior students obtain, open doors to universities all over the world. Cambridge Secondary 2 (ages 15 to 16) leads to the IGCSE qualification and Cambridge Advanced (ages 16 to 19) leads to the AS and A Level qualifications. More information can be found on www.cie.org.uk.

The curriculum stretches, challenges and inspires learners to extend themselves and to think outside the box. For each learner, an individualized learning plan is created. Learners set their own learning pace in mixed-age groupings, enabling them to learn from and help one another. Educators support the learners and their individual needs. A vital aspect within Generation Schools is the drive to bridge the gap between education and profession. Therefore, each term, learners are placed in various organisations to gain valuable on-the-job experience. Through these placements, learners gain a broader understanding of how various businesses work.

Extracurricular programme
Students can participate in extracurricular activities. The offer varies from campus to campus. Various cultural activities are offered such as music lessons, drama and choir. In addition, Generation Schools has a technology anchor. Students explore, for example, flying drones, coding, robotics, programming, computer science, security and networking.

Sport
Learners can participate in a range of sports. The Generation Schools sports team benefits from a team of elite and expert professional coaches and has beautiful facilities at each campus.
